

LAB Usage Guidelines

General Guidelines

-  **Lab Cleanup:** Please ensure that all lab resources are properly deleted upon lab completion. This helps prevent unnecessary usage and conserves allocated resources.
-  **Access Restrictions:** Access within the lab is limited to specific services and configurations designated for training purposes only. Modifying or attempting to access unauthorized resources is strictly prohibited.
-  **Monitoring & Compliance:** All lab activities are monitored for security and compliance. Misuse of resources may result in restricted access or revocation of lab privileges.

Do's

-  **Follow the lab manuals carefully** and use only the specified configurations to ensure a seamless lab experience.
-  **Finish all lab exercises within the allotted time.**
-  **Reach out to your trainer immediately** if you face any technical difficulties or require assistance.
-  **Make sure to delete all resources once the lab is completed.** If you experience any issues during the deletion process, seek help from your trainer.

Don'ts

-  **Never share your login credentials** with anyone under any circumstances.
-  **Avoid installing or running unauthorized software** in the lab environment.
-  **Do not conduct stress tests, penetration tests,** or any unapproved security activities that may disrupt the lab.
-  **Refrain from storing personal, sensitive, or production-related data** in the lab.
-  **Do not attempt to alter lab infrastructure or permissions** beyond what is required for exercises.
-  **Do not leave lab resources running unattended** for extended periods.
